**D**r. Kathy Maupin, M.D., and BioBalance 4® Women and Men are treating patients from all over the world who come to St. Louis to receive bio-identical hormone pellet replacement. These patients receive bio-identical hormones in the safest and most effective way—hormone pellet therapy.

BioBalance 4 Women® & BioBalance 4 Men, LLC, is a practice that combines bio-identical hormone therapy for women and men, comprehensive health and wellness planning, and anti-aging skin care. The purpose of this innovative medical model is to bring back the energy and libido we all experienced in our 30s.

This visionary path taken by Dr. Kathy Maupin and her staff of nurse practitioners and R.N.s contradicts the classic American medical model that simply accepts the deleterious effects of the aging process, treating symptoms of diseases and ignoring “health” as a goal. In contrast, BioBalance 4 Women® and BioBalance 4 Men® replace hormones that disappear as we age.

Replacement is done using the exact hormone and the exact delivery method necessary to re-create health, instead of merely treating illness.

Dr. Maupin is a pellet patient who has been transformed by this therapy after having her own ovaries removed seven years ago. Through BioBalance® she is sharing the health she now experiences herself. You too can join her in saying, “I’m back!”

Kathy C. Maupin, M.D.
