Skin Care

Feel Great, *Look Great* All-Natural Skin Care For You

While you renew your passion for life with BioBalance Pellet Therapy, make sure you renew your skin as well! BioBalance Botanical Skin Care uses all-natural ingredients to enhance the youthful glow created by BioBalance's bioidentical hormone therapy. Created especially for BioBalance in consultation with Dr. Kathy Maupin, our skin care literally changes your skin for the better – reducing the look of wrinkles, minimizing brown spots and helping the outer you match the vitality of the inner you.

After a month or two of seeing the benefits of the skin care line, try the BioBalance laser therapy program to further reduce brown spots or resurface your skin. With six types of laser therapies available, our laser treatments offer the final step in the BioBalance plan to not only renew your skin, but your life!
